

ONE STOP TEST AND CERTIFICATION SHOP
FOR THE WIRELESS WORLD

◆ “Test Services Uber”

- TESTiLABS does not own test gear – We combine specialized test labs and service providers to unique set of services from/to one contact point.
- Most of us are ex-Nokia test experts operating ex-Nokia/Microsoft state of the art test labs. Over the years we have gained solid expertise in testing mobile phones, tablets, routers, antennas, base stations, wearable- and IoT-devices.
